IDEXX IVRA EDUCATIONAL SCHOLARSHIP REPORT

I am a beneficiary of the IVRA educational scholarship sponsored by IDEXX. I was privilege to spend six beautiful weeks at the diagnostic imaging facilities of the small animal, equine unit of the ROYAL VETERINARY COLLEGE HAWKSHEAD CAMPUS.

During my visit I was opportune to visit the diagnostic imaging facilities of the equine, small animal unit. I was given access to the hospital internet facilities, student cases, teaching cases, cases records, journal club, studying materials, textbooks etc.

I was also taught the basis of other imaging modalities such as computed tomography, magnetic resonance imaging, which have never been expose to, the procedures, process in acquiring good images and interpretations.

Personally, am so happy to have been given this great opportunity, have learnt a lot especially basic imaging modalities and modes of interpreting, I can read radiographic views, interpret and also read other imaging modalities. This is a beautiful step in my journey in veterinary imaging. I left far much better than when I came.

Finally I want to say a very big thank you to professor Ann Castern, Rhiannon, Dagmar, Matty, Elizabetta, Alana, Francisco, everyone from the RVC imaging team, especially those from the equine hospital. They all made this possible and successful. Words will fail me, it was indeed a beautiful and great opportunity which meet the criteria of IVRA scholarship.

Many young veterinarians like me aspiring in the same field of diagnostic imaging should make use of this great opportunity.

Thanks so much to IVRA for this opportunity. Anew phase has indeed been activated for me

Yours sincerely

Dr Esther Ojo A

Tanoj Veterinary and Consult,

Kogi State, Nigeria
